

NSBT
CORE JAVA – DAY 17 ASSIGNMENT

1. Create a JAR file of the BRD 1 – Validation Functions and install it in the .m2 repository. Use the same as a dependency in another Project and call the Validation methods to test the inclusion.
2. Given below is the class diagram for the classes already created during the Inheritance and Collections assignments. Reuse the same classes.

Create multi-module project for the above diagram as mentioned below:

1. Take Bank class in module1 and rest of the classes in module2.
2. Main class is in module1.

Test the functionalities.

3. Import this Project using SVN and perform the checkout, update, revert commands on it.
