

1. Create the HTML page according to the given snapshot. You need to add JavaScript validations for the fields as mentioned below:

The screenshot shows a web form with a navigation bar at the top containing links: Product, Application, Receipt, View, and Report. Below the navigation bar, there are two tabs: "Customer Information" (active) and "Loan Information". The form is divided into three main sections: "Personal Information", "Employment Details", and "Address Details".

Personal Information:

- Gender*: A dropdown menu with "Female" selected.
- Last Name*: A text input field.
- Nationality: A dropdown menu with "Indian" selected.
- First Name*: A text input field.
- Full Name*: A text input field.
- Date of Birth*: A text input field.

Employment Details:

- Occupation Type*: A dropdown menu with "Select One Option" selected.
- Organization Name: A text input field.
- Total Work Experience: A text input field.

Address Details:

- House No: A text input field.
- State: A dropdown menu with "Select One Option" selected.
- Country: A dropdown menu with "Select One Option" selected.
- City: A dropdown menu with "Select One Option" selected.
- House No: A text input field.

At the bottom right of the form, there are two buttons: "Save" and "Next".

- a. All fields marked with (*) are mandatory
- b. Date of Birth should be in the format of DD-MM-YYYY
- c. The House Number should be numeric only.
- d. First Name and Last Name must be alphabets only and contains minimum 3 characters.
- e. Total Work Experience must be positive number only and minimum value is 0.
- f. Based on the country being selected in the drop-down, the state drop-down shows the corresponding states and when a state is selected, the city drop-down shows the corresponding cities

When user clicks on the "Loan Information" Link, the following screen must be visible in the same in the same place.
